STRETCH CEILING MASTERS

ARE EXPERTS IN THE FIELD OF NEW GENERATION STRETCH CEILINGS

The warranty on material - 10 years.

- 🔥 Fire Retardant
- 🔊 Acoustic
- 💡 Light transmission
- 🛡️ Waterproof
- 🪞 Reflection
- ↔️ Width max 5 meters

Individual approach

We are ready to offer a solution to all non-standard tasks, perform complex installations and are able to guarantee the perfect result of work.

Stretch ceiling is a modern interior design concept that involves a flexible membrane, typically made of PVC or fabric, stretched tightly across a room's ceiling. This innovative approach not only conceals structural elements and imperfections but also allows for unique lighting, acoustics, and design possibilities, making it a versatile choice for enhancing both residential and commercial spaces.

Stretch Ceiling Masters propose stretch ceilings in a wide range of colors and textures. Texture glossy, matte, satin, translucent and metallic. All textures are suitable for printing pictures at our factory. Any design, picture or logo can be printed on the membrane. The ceilings are provided with a **10 years warranty**.

We also offer various lighting solutions and prefabricate metal structures for complex ceilings installation. Stretch Ceiling Masters products are suitable for every room including rooms with high fire protection and environmental control requirements (i.e. nurseries, recreational and educational institutions)

ART PRINT CEILINGS

A wonderfully distinctive mood will be aided by the graphics printed on the stretch ceilings.

Hypoallergenic, fire safety

Each and every one of the inks used to print on stretch ceilings is a blend that is resistant to moisture, mechanical impact, electricity, or direct sunlight.

One advantage is that the customer has a range of pictures to choose from, including his own portrait, to hang from the ceiling.

Eco-friendly and Safe Printing

Our designers professionally process the image before submitting it to print. What produces the best image resolution and customer satisfaction results.

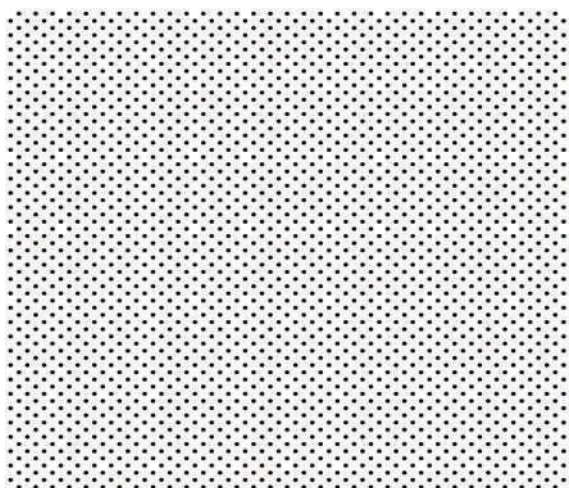

ACOUSTIC CEILINGS

Reduce unreasonable noise in a realistic, assured, and long-lasting manner.

Durable, practical, simple to maintain, and resistant to UV radiation were all mentioned in the acoustic test result. The use of acoustic stretch material is safe for human health because it doesn't contain any hazardous materials. Our solutions for soundproofing ceilings are a simple, stylish, and efficient method to improve the acoustics of any room. When it's vital to suppress noise, it can be used in both public and private settings.

We provide six perforated materials with various sound-absorbing qualities, whose perforation densities and diameters are as follows:

(Micro perforation)

01 Volans

02 Volans premium

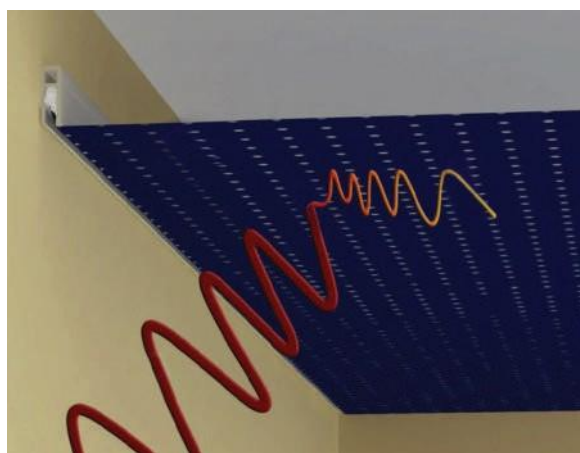

03 Auriga

04 Orion

(Macro perforation)

05 Cetus

06 Libra

TRANSLUCENT CEILING

You can simulate the look of a fully illuminated surface.

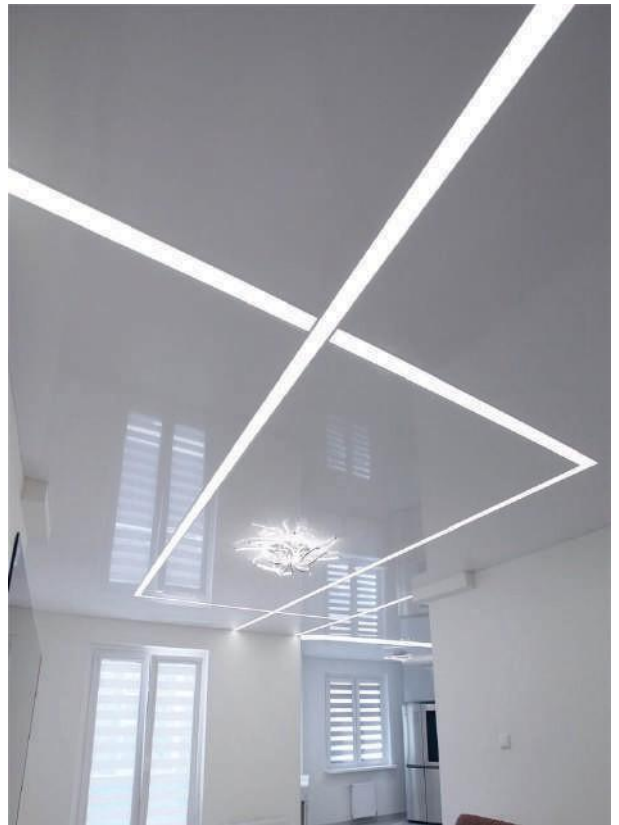

With lighting and illumination, translucent ceilings can produce distinctive and original ceiling coverings in a variety of styles and shapes. can serve as the room's primary source of lighting.

LIGHT LINES & STRIPES

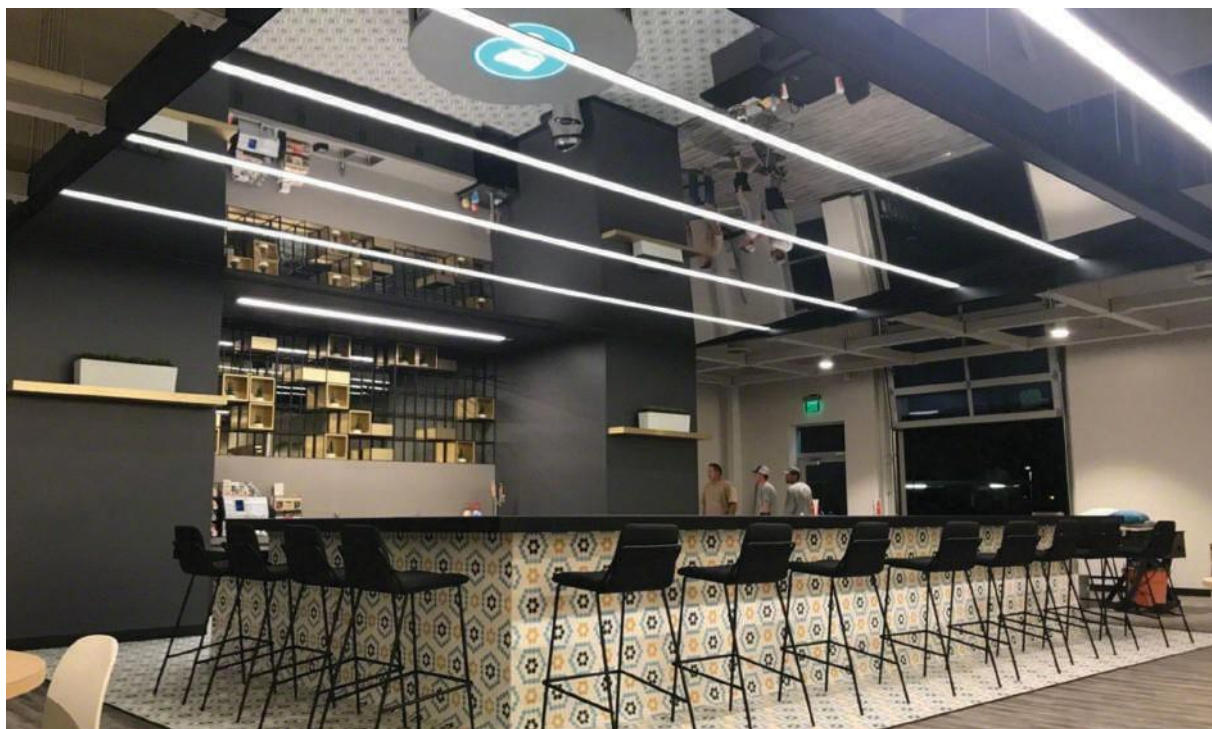

50 meters - length of the light line without any joint.

Design with striped design components. Curved ornaments or lines can be made. It may be mounted on a wall. ceiling, utilised as a pendant lamp, or utilised as corner lighting

MIRROR CEILINGS

Our catalogue offers ceiling mirrors in 3 different colours.

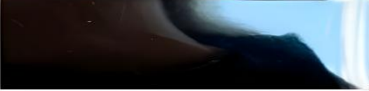

Additional colors by request.

This coating ensures that all of the room's objects and light will reflect in a high-quality manner. These ceilings feature a surface that reflects light well, making them virtually identical to real mirrors while being much safer and lighter than the latter.

Each of the available colours for such a ceiling can add a festive, opulent, and festive ambiance to your house or other public spaces like a restaurant, hotel, etc.
